

After putting up with much pain in my right hip due to osteoarthritis, i knew it was time to seek help from a consultant and his team regarding the situation. I was really frightened and anxious about going ahead with my surgery, but Mr Jafri, his anaesthetist and team put me at complete ease from beginning to end, not even realising that i had been into theatre and that it was all over. So happy and relieved i am pain free and starting back with the hobbies and fitness regimes which i love. Thank you all so very much for the care and attention i received, i am truly grateful to you all. Regards SA.
