

Hello Mr Jafri

I am writing to give the feedback from my two recent hip replacements.

In 2010 I began to suffer severe pain in my left knee which was ongoing and debilitating. This affected my daily life in a most distressing manner as I was in constant pain and severely restricted in any physical activity. I had no quality of life due to this. It was at this point when I was referred to see Mr Jafri at the Nuffield. I was given an x-ray and Mr Jafri explained that I needed a hip replacement urgently which was scheduled for July 2013. Mr Jafri performed the surgery himself with great success. Throughout the process Mr Jafri explained everything to me in great detail and answered all of my questions. Mr Jafri always made me feel that he had time for me and I never felt rushed when in consultations with him. He has an excellent bedside manner and I could not have had better care.

In the October of 2015 I had my right hip replacement operation, again performed by Mr Jafri. Once again I felt looked after before, during and after the surgery and again it was a great success. Mr Jafri instilled in me a great sense of confidence in his care and skill as a surgeon to the point where I had no concerns about the surgery and aftercare.

This experience has given me back my life. I cannot thank him and the staff at the Nuffield enough including the physiotherapy department who gave me exercises to do every day, several times a day. I did the exercises as directed and am convinced that this played a huge part in my rehabilitation. I would strongly advise anyone who has this operation to perform daily exercises without fail.

Thank you for all of your time and care, I cannot tell you how much I appreciate everything you have done for me.

Kind regards

Ethna Boase
