

Hello Dr Jafri,
Below are my feelings 3 months after operation.

My first meeting with Dr Jafri took place in November 2012 to discuss the replacement of my extremely painful left hip, i found that he explained the procedure in a positive, friendly and thoroughly professional manner, at the end of this meeting i had no qualms about agreeing for Dr Jafri to go ahead with the operation and even asked if it could be done at the earliest opportunity, to which Mr Jafri promised that he would attempt to do so.

A couple of days later i was contacted by the hospital on behalf of Mr Jafri and a date for the operation was set for Dec 19th which was sooner than expected but gladly accepted due to the severity of the pain from the hip.

In my opinion the skill and expertise of Dr Jafri can be best described post opp / recovery time.

Dec 19th, Operation performed approx 7.30pm, woke around 10pm, **hip pain free**

Dec 20th, After breakfast up and about with walking aid, **hip pain free**

Dec 21st, Now walking around with 2 walking sticks, **Hip pain free**

Dec 21st, Visit from Dr Jafri and after chat told i could go home, **hip pain free.**

Approx 10 days later i was walking around house without any sticks

4 weeks after op i was walking the dog without sticks

Early Feb after my 6 week check up Dr Jafri advised me that i can return to work.

I write this mail after my 3 month check up with Dr Jafri i, think he was just as pleased as i am with my progress of recovery. The relief from pain which was effecting all of my life and had lasted for the past 5 years is now just a memory, only 3 months after the opp i am leading a normal life and still totally pain

free.

As i said previously the skill and expertise of Dr Jafri can be measured in my recovery which in my opinion is exceptional, my only regret is that i suffered for 5 years before before meeting Dr Jafri and i would not hesitate in strongly recommending him to anyone who has any doubts with going ahead with a hip replacement

Many Thanks for giving me my quality of life back

Paul
